

A technical drawing of a mechanical assembly, likely a pump or a valve, shown in a cross-sectional view. The drawing is divided into two main sections by a horizontal line. The upper section shows a vertical assembly with a central shaft (1) passing through a series of components. At the top, there is a flange or cap (5) with a bolt (3) securing it. Below this, a series of angled, wedge-shaped components (8) are arranged vertically, each secured by a bolt (6) on the right side. A horizontal plate (4) is positioned below the angled components. The lower section shows a cross-section of a housing or base (1) with a central shaft (2) passing through it. The shaft (2) is connected to a series of angled components (8) that are part of the upper assembly. The drawing uses solid lines for visible edges and dashed lines for hidden internal features.
